

911TRACKER®

Safety – Security – Simplicity!™

How 911TRACKER T1 works

STEP 1

THIEF breaks into your car and T1 immediately sends a message to the vehicle Owner

STEP 2

OWNER receives notification, verifies event, and then enters PIN number and command for T1 to make silent 3-way call directly from the vehicle to 911

STEP 3

911 receives the call from T1 and talks with the Owner to understand the emergency while viewing vehicle location on their screen

- **911TRACKER T1** allows you to help safeguard and track your vehicle directly through your mobile phone!
- **911TRACKER T1** provides real-time GPS location of vehicle to you and to 911!
- **911TRACKER T1** protects you, your family and your vehicle!

911TRACKER®

The Safe, Secure and Simple-to-Install Vehicle Protection Device

911TRACKER T1

FACTS

Every twenty six seconds a motor vehicle is stolen in the U.S. 40% of all vehicle thefts occur in the western part of the country with California leading all states in being the only state with a motor vehicle theft increase of 4.5% (2007 FBI Uniform Crime Report).

911TRACKER, a California company, has developed a new patented product called the "T1" which provides vehicle owners with the ability to safeguard, track and recover their vehicles 24/7 directly through their mobile phones.

CAPABILITIES

- 911 TrackDirect provides direct 3-way call for owner & 911 to discuss the emergency as soon as it occurs
- Locate your vehicle – GPS location coordinates sent to owner with Google Map view
- Car moves out of designated area – Alarm notification sent directly to owner
- Can control T1 functions through mobile phone, e-mail or www.911track.com website
- Owner needs help to unlock car door or wishes to remotely start engine
- www.911track.com securely provides information about the vehicle description to assist police

BENEFITS

- Simple to use
- Easy installation with built-in antenna
- Owner controlled – replaces expensive call center
- Nationwide coverage
- Back-up battery with automatic recharging & alert
- Can connect to existing vehicle security systems
- Can be transferred to other vehicles
- Police registration of vehicle not required
- Provides real-time tracking, SafetyNotice™ (over set speed limit) and GeoNotice™ (out of specified area)
- Initial 2 months service FREE
- Low monthly cost

OPTIONAL FEATURES

- Keyfob to control guard modes & panic alarm
- Adapter for portable use in rental vehicles
- Special antenna for custom installations
- Control: Locks, engine start & starter lockout, etc.
